

In order to apply styling in header we need to modify the experiencefragment_footer.css from the ui.frontend folder

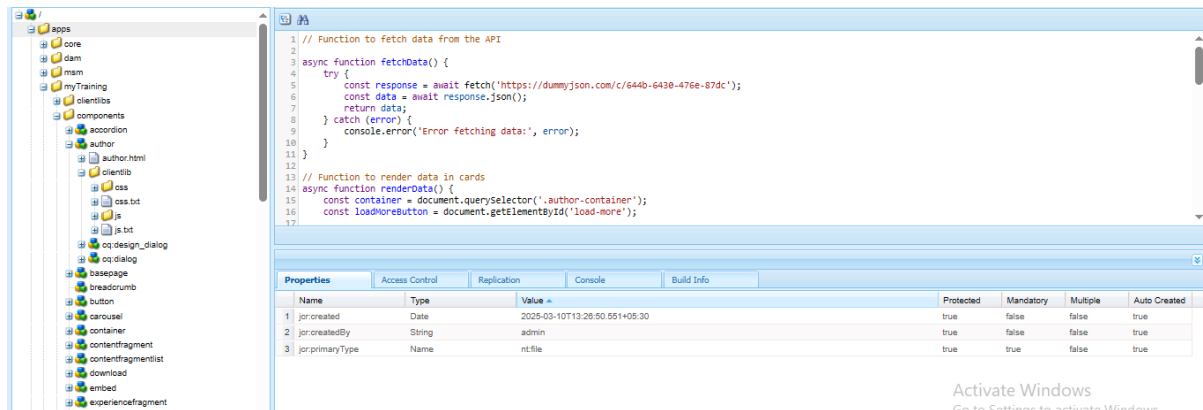

In order to apply styling in header we need to modify the experiencefragment_header.css from the ui.frontend folder

Modify the author component in this hierarchy in order to store the author details with the books as multifield

We can also fetch a api key and get the book details from a json file I am using a dummy api key of 10 books details <https://dummyjson.com/c/644b-6430-476e-87dc>

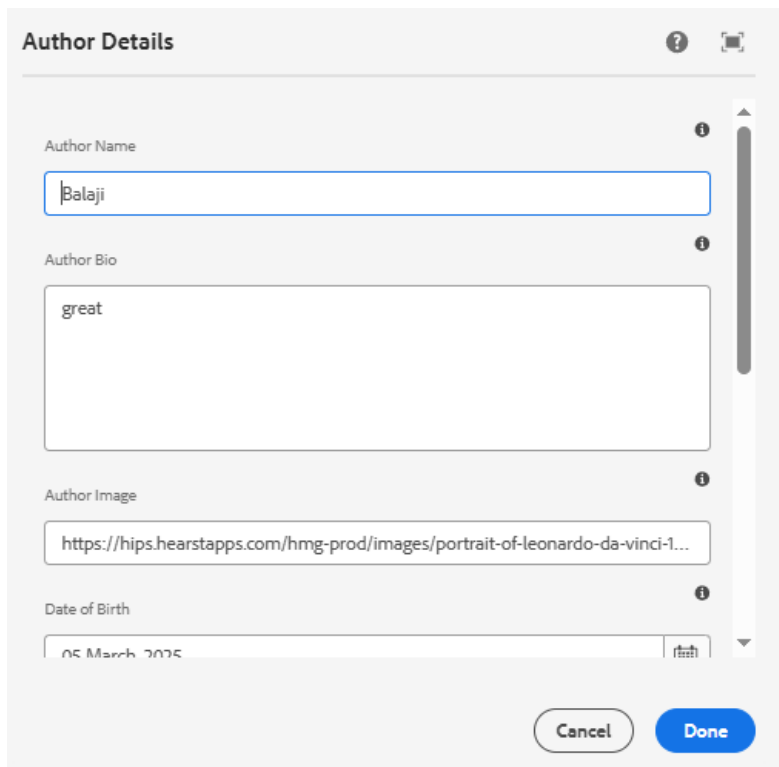

Create a new page here I am creating a page called test

Here we need to choose the page template and want to add the author component to it

Here enter the author name,Bio,Author image to it and give the date of birth

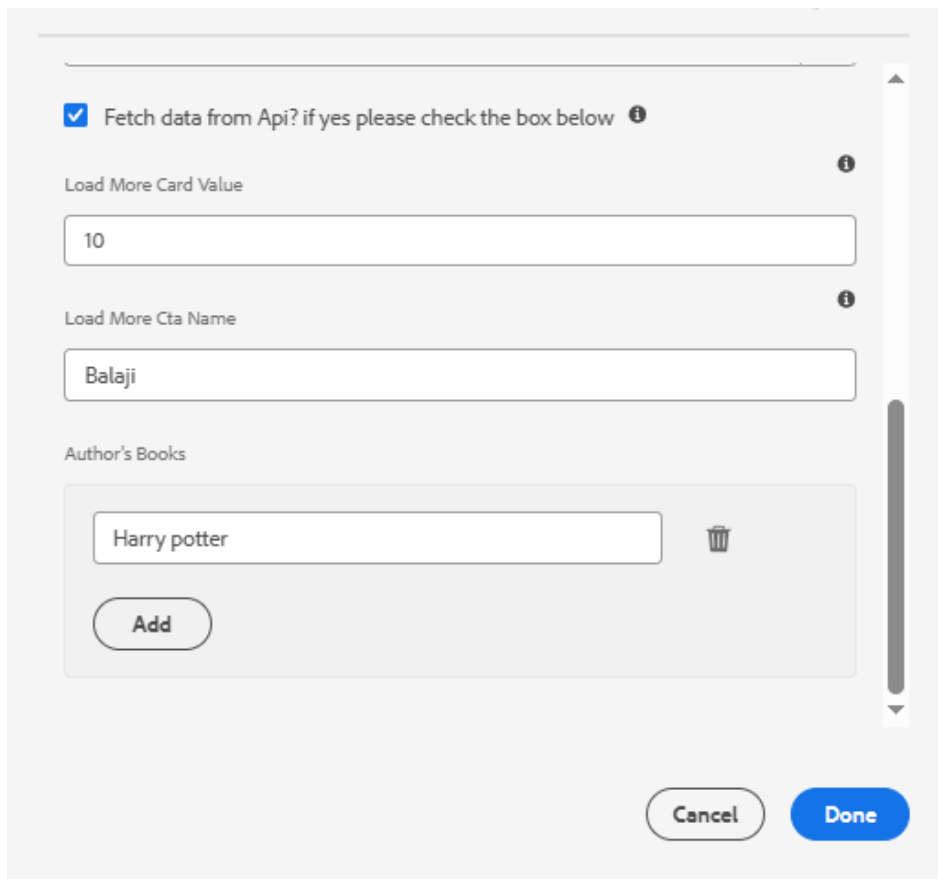

The 'Author Details' form contains the following fields:

- Author Name:** A text input field containing 'Balaji'.
- Author Bio:** A text area containing 'great'.
- Author Image:** A text input field containing the URL 'https://hips.hearstapps.com/hmg-prod/images/portrait-of-leonardo-da-vinci-1...'.
- Date of Birth:** A date picker showing '05 March 2025'.

At the bottom right are 'Cancel' and 'Done' buttons. A vertical scrollbar is on the right side of the form.

Now check the checkbox to fetch the Api key and enter the amount of card's needed to it

This form includes the following sections:

- Fetch data from Api?** A checkbox that is checked, with the text 'Fetch data from Api? if yes please check the box below'.
- Load More Card Value:** A text input field containing '10'.
- Load More Cta Name:** A text input field containing 'Balaji'.
- Author's Books:** A section with a text input field containing 'Harry potter', a trash icon, and an 'Add' button.

'Cancel' and 'Done' buttons are at the bottom right. A vertical scrollbar is on the right side.

In the page we can see the Author Details along with the image of the auhtor

Author Name: Balaji

Activate Windows
Go to Settings to activate Windows.

We can also see the list of books and its description which is given in grid format fetched from the API key we have given
